

Load Function

```
.func Rload_val(t)=Vsource/(Iload + Iload_ripple*sin(2*pi*4*t-pi/4))
```

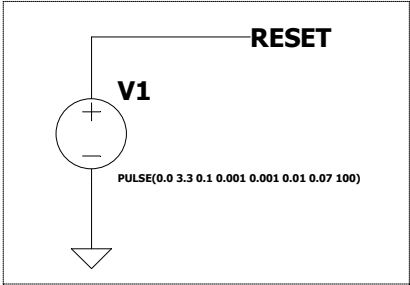

Input Source Parameters

```
.param Vsource = 3.3  
.param Vripple = 0.01  
.param Iload=0.3  
.param Iload_ripple = 0.12  
.param Fripple = 5  
.param simTime = 1.0  
.tran 1
```

Passive Components Values

```
.param R_ref1 = 28.4k  
.param R_ref2 = 30.0k  
.param Rshunt = 55m
```

Reset (push-btn / GPIO)

Voltage Source
